

FP CORPORATION

Relationship with Shareholders

Firman Ariangga

Noery Mutiarahim

FP Corporation was established in July 24, 1962 as a specialist manufacturer of food containers, as used in supermarkets, convenience stores and other food stores. Produce a wide range of food containers designed to enrich food culture and the way eat on a daily basis. Also have a long standing commitment to the environment, and have established both “tray to tray” and “bottle to tray” recycling systems using the unique FPCO Method. FP Corporation has 795 employees (FPCO Group: 4,032 Group).

According to the corporation philosophy which is creating superior products at competitive prices and delivering them to our clients when they need them. FP Corporation’s containers are high value-added products with various functions, including packaging, transport, storage, heating, and meal preparation. Food containers manufactured by FP Corporation support eating habits in many different ways. Food containers are indispensable to the delivery of food from production centers to households in the process of food production, processing, distribution, and sales. The use of food containers provides many different advantages. The food containers are at work behind-the-scenes to help supermarkets and convenience stores provide consumers with safe and secure food.

Product recycling system that FP Corporation used is FPCO Method. The FPCO Method involves turning recovered trays and bottles into raw materials, and then making them back into trays. FPCO cannot recycle trays and bottle on its own. Recycling is an all-inclusive process that needs everyone to lend a hand. Once used trays and bottles have been collected by supermarkets and other such stores, they turn back into raw materials at FPCO’s recycling plants and then reborn as new trays. These recycled trays is Eco Tray or Eco APET.

Appropriate disclosure of corporate information. FPCO always discloses corporate information in a timely, fast and impartial manner.
